Overview

Notified provides companies with a simple and cost-effective solution to deliver exceptional webinars to global audiences. Equipped with powerful interactive tools and capabilities, the platform enhances your webinar experiences through engagement features such as chat functions, polling, and emojis that will keep your audience members engaged and wanting more. Not only that, Notified also provides comprehensive analytic tools that let you measure the success of your webinar that will help you build more compelling experiences down the line.

Discover creative ways to connect with global audiences, build community, and drive long-term demand.

• **Global Scale**: Communicate effectively and authentically to a dispersed audience that might not be able to travel or attend physical events.

• **Studio Production Quality**: Deliver television quality videos with high end production technology and engagement tools.

• **Simple Delivery and Syndication**: Stream with a click of a button to several destinations at once including social channels and OTT devices.

• **Enterprise Ready Integrations**: Integrate easily with other enterprise software solutions for a streamlined technology stack.

• **Reliable, Secure, Scalable Technology**: Trusted by the world’s largest organizations for their most critical events with the option for world-class service, experience, and consultation.

• **Robust Analytics**: Tailor your content to your audience and obtain the data you need to deliver marketing qualified leads.

• **Cost Savings with Cloud Communications**: Broadcast quality streaming for live or pre-recorded content through the “studio in the cloud”. Avoid the need for high-cost production studios and equipment.
